

SCREENING

Treated water from 50 to 2 000 L/s
Screening from 3 to 10 mm
Ecological continuity respected

FILTRATION

Filtered flow up to 700 L/s
Mesh filtration from 45 to 500 μ

SLUDGE CONCENTRATION

Dewatering up to 20 % of dryness
Continuous functioning equipment
Allows recovery of fish farm effluents

TAILOR-MADE OXYGENATION

Gravity-fed or by pumping
Optimisation of dissolution yields
Energy management
