

TAILOR-MADE OXYGENATION SYSTEM

Sizing and marketing of efficient oxygenation systems with controlled energy consumption

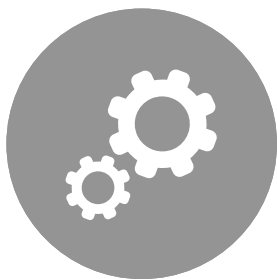

GRAVITY-FED OR BY PUMPING

U-TUBE, LOW HEAD OXYGENATOR SYSTEM

INTENDED FOR WATER INLET OR RECIRCULATED

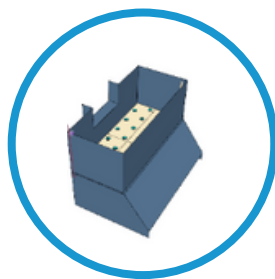

An oxygenation system that is reliable and suitable for your production plan and breeding conditions !

SIZING

Adaptation to fish farm configuration, calculation of dissolution yields, energy optimization

IMPLANTATION

Installation based on the 3D plan, civil and hydraulic engineering

SUPPORT

Training of fish farmers to master the oxygenation system
