

SLUDGE CONCENTRATOR

Sizing and marketing of sludge concentrators to obtain dried sludge that can be used in agriculture

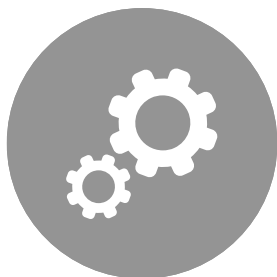

14 AT 20% OF SLUDGE DRYNESS

MAXIMUM PROCESS FLOW AT 30 m³/h

UP TO 720 kg/j OF SLUDGE WITH 20% OF DRYNESS

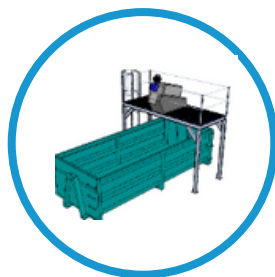

99% OF SLUDGE CAPTURED BY FILTERS IS TREATED

The ERM environment sludge concentrator guarantees continuous operation !

SIZING

Sizing of suitable concentrator according your releases, calculation of head loss, energy optimization

INSTALLATION

Installation based on the 3D plan, civil and hydraulic engineering

SUPPORT

Support on the storage and recovery of sludge
Supply of consumables materials
