

DRUM FILTER - DF

Sizing and marketing of drum filters for an installation on fish farm exit, on a recirculated system, or between 2 ponds groups

FILTERED FLOW UP TO 700 L/s

FILTRATION MESH FROM 45 TO 500 μ

INTERNAL OR EXTERNAL BACKWASH

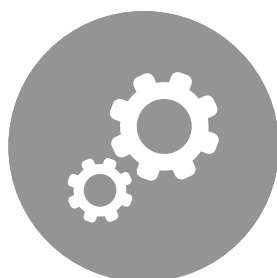

3 DF RANGES, 6 MODELS BY RANGE

Range DF	Diameter	Max water height	Max flow 63 μ *	Max flow 100 μ *
Units	mm	mm	L/s	L/s
G	1610	1300	480	670
s	1260	100	370	520
R	900	800	290	410

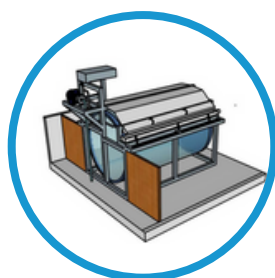

*Effluent at 10 mg/L

Opt for ERM reliability for a continuous operation !

SIZING

Sizing of suitable filtration, calculation of head loss, energy optimization

INSTALLATION

Installation based on the 3D plan, civil and hydraulic engineering

SUPPORT

Supply of meshes and nozzles
Option: support on sludge concentration project
