

ERM ENVIRONNEMENT

OXYGEN SYSTEM

 French manufacturing

Why Choose Us

Tailor made Project

Tailor made solution adapted to your fish farm and production requirements.

Consulting Expertise

Solutions designed to minimize head losses and optimize energy efficiency.

Advanced Technology

Innovative solutions designed to protect the environment and improve the fish and farmers welfare.

Rapid After Sales Services

Efficient after-sales service and prompt access to spare parts.

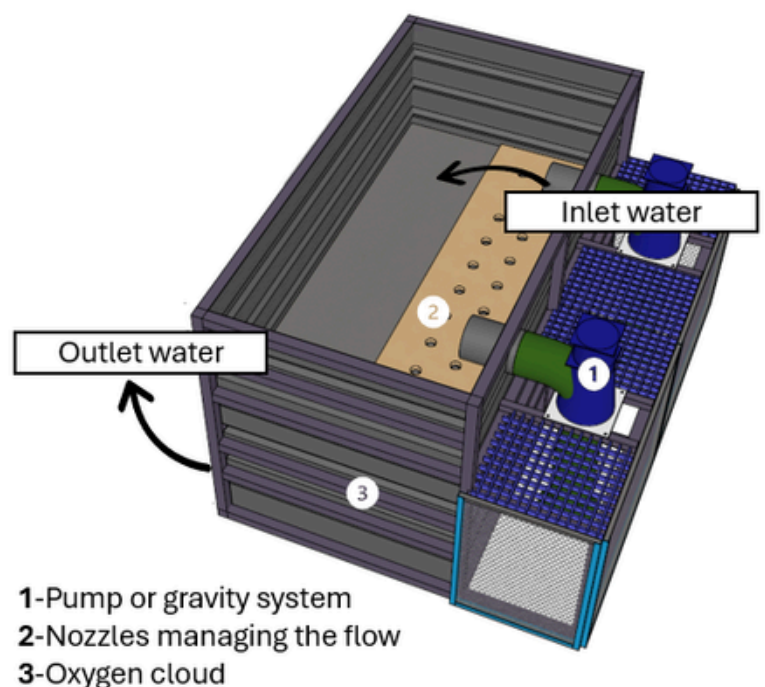

Our Oxygen System

Technology Features

- Low head oxygenator or U-tubes system
- Inlet : pump or gravity system
- Flow : 20 to 800 L/s
- Shape : round or rectangular
- Material : stainless steel, resin, concrete

Project Management

- Hydraulic engineering tailored to site-specific flow conditions
- 3D design and visualization
- Optimized energy consumption
- Cable and pipeline connection management
