

ERM ENVIRONNEMENT

LEAF SCREENER

 French manufacturing

Why Choose Us

Tailor made Project

Tailor made solution adapted to your fish farm and production requirements.

Consulting Expertise

Solutions designed to minimize head losses and optimize energy efficiency.

Advanced Technology

Innovative solutions designed to protect the environment and improve the fish and farmers welfare.

Rapid After Sales Services

Efficient after-sales service and prompt access to spare parts.

Our Leaf Screener

Technology Features

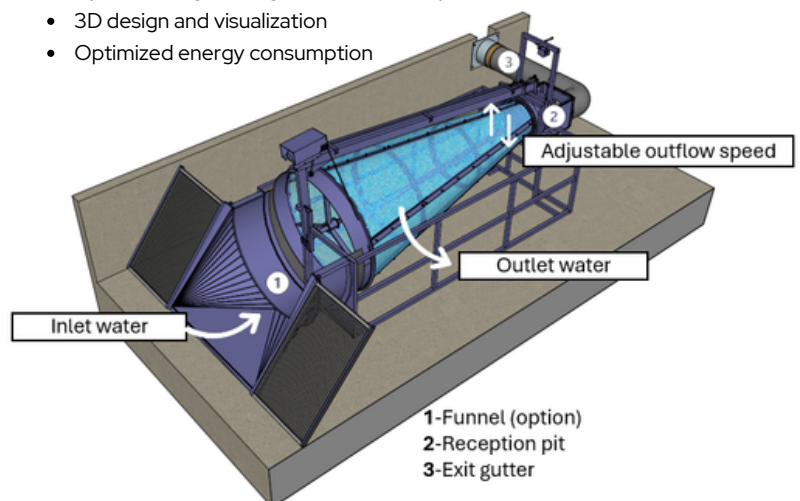

- Flow : 35 to 2 000 L/s
- Mesh : 3 to 10 mm
- Motor power : 0,25 kW
- Backwash pump power : 0,75 to 1,5 kW
- Funnel option for improving hydraulic

Environment Protection

- Guaranteed sediment and ecological continuity
- Ensuring free passage for aquatic wildlife
- Fine mesh filtration captures leaves and plant residues
- LS inclination ensures adaptable outflow speed
- Exit gutter dimensions prevent clogging

Project Management

- Hydraulic engineering tailored to site-specific flow conditions
- 3D design and visualization
- Optimized energy consumption
